SG IS FUND - EMERGING MARKETS EQUITY

Monthly Factsheet

INVESTMENT OBJECTIVE

The Sub-Fund seeks to provide long term capital appreciation over a cycle (5 years) through investments in a diversified and sustainable portfolio of emerging markets equity securities. The Sub-Fund will use quantitative (i.e. mathematical or statistical) models which are proprietary to the Investment Manager in order to achieve a systematic (i.e. rule based) approach to stock selection.
The Sub-Fund is actively managed with reference to the following benchmark: MSCI Emerging Markets Markets net total return in USD (Bloomberg ticker: NDUEEGF index). The benchmark is used both for performance comparison and as a universe from which to select securities.
The strategy of the SG IS Fund - Emerging Markets Equity changed in March 2025.

PERFORMANCE

Past performance should not be seen as an indication of future performance.

SG IS FUND - EMERGING MARKETS EQUITY

SEPTEMBER 2026

MANAGEMENT COMMENTARY

Market Review. The MSCI Emerging Markets Index (Net) returned -0.37% over the trailing quarter ending 30 September 2026 in USD net terms. Despite the quarterly decline, the index remained strongly positive year-to-date, returning 23.38%. Taiwan, China, and Brazil were the strongest positive contributors, while Korea and India weighed most on the benchmark. At the sector level, Financials, Materials, and Energy contributed positively, while Information Technology, Industrials, and Communication Services detracted.

AI-related technology remained an important support for emerging markets, particularly through Taiwan, where export orders reached a record monthly value in August as AI, high-performance computing, and cloud-service demand continued to support the semiconductor and server supply chain. However, technology leadership became more volatile later in the quarter as rising oil prices, higher bond yields, and renewed rate concerns pressured long-duration growth stocks and Korea-linked chip exposure.

Performance: Over the trailing quarter ending 30 September 2026, SG IS Fund - Emerging Markets Equity delivered official gross return of -0.31%, outperforming the MSCI Emerging Markets Index (Net) benchmark by 0.06% (USD gross).

Sentiment Insights contributed positively, helped by analyst-revision, broker-text, and flow-related measures. These Insights favoured companies with improving revenue links, constructive analyst commentary, and supportive price or positioning trends in an environment marked by high dispersion across emerging markets, AI-led stock leadership, and sharp country and sector rotations.

Themes Insights also contributed positively. Regional and industry thematic Insights captured strength in LATAM and selected energy-related exposure, while also helping the portfolio navigate uneven trends across Asia. Paramount contributors included those leveraging AI techniques to analyse a breadth of localised alternative data sources capture granular, domestic market leadership, commodity-sensitive areas, and industry trends.

Fundamental Insights detracted. Dividend-yield and traditional valuation measures were less rewarded in a market driven more by macro shocks and AI demand. Some cheaper dividend and book-value exposures helped, but the overall Value complex was a modest headwind. **Quality measures** also delivered mixed performance.

On the sector level, the key contributors were Consumer Discretionary, IT, and Energy. Consumer Discretionary contributed through reduced exposure to retailing and automobiles, both of which were pressured by higher rates and softer consumer demand. IT also added despite benchmark sector weakness, as the model was relatively light in semiconductors when parts of the chip complex sold off late in the quarter. Energy, on the other hand, benefited from greater exposure to oil and gas, supported by stronger crude prices and Petrobras strength. Financials detracted most, as limited bank exposure hurt while positions in diversified financials and insurance also weighed on returns. Health Care detracted primarily from limited exposure to selected pharmaceutical names, which performed well.

On the country level, the key contributors were Mexico and Brazil. Mexico added through positioning in metals & mining, which benefited from resilient commodity demand and strength in resource-linked areas. Brazil contributed mainly from greater exposure to oil and gas, as higher crude prices and Petrobras strength supported the sector. The main country detractors included Taiwan and Saudi Arabia. Taiwan detracted from limited bank exposure, as well as selected positions in communications equipment and capital goods that came under pressure.

On the stock-level, Petrobras and Advantech were among the key contributors. Petrobras was supported by regional LATAM Insights and industry-focused Insights capturing strength in oil and gas. The stock performed well as crude prices rose, production momentum improved, and analysts remained positive on the company's dividend and cash-flow profile. Advantech's position was supported by Insights focused on Taiwan monthly sales trends and company-specific sentiment/market behaviour. The stock benefited from strong demand for industrial AI, semiconductor equipment, and edge AI products, with Taiwan's broader AI supply chain remaining a key market driver during the quarter.

Positioning: The portfolio's largest sector overweight was Energy, while the largest sector underweights were Utilities and IT. At the country level, the largest overweights were Thailand and UAE, while the largest underweight was China.

GLOSSARY and DISCLAIMER

SFDR (Sustainable Finance Disclosure Regulation)

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosures in the financial services industry (the so-called SFDR Regulation or Disclosure Regulation).

TAXONOMY

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2002 (known as the Taxonomy Regulation) establishes a framework to facilitate sustainable investment and amends Regulation (EU) 2019/2088.

ESG RATING

MSCI ESG Ratings aim to measure a company's resilience to long-term, financially relevant ESG risks (Environment, Social et Gouvernance). For each company a Weighted Average Key Issue Score is calculated based on the underlying Key Issue scores and weights. To arrive at a final letter rating, this score is normalized by industry. **The Industry Adjusted Score corresponds to a rating between AAA and CCC.** These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.
*The ESG quality score of the universe is adjusted for the 20% lowest ESG scores.

Letter Rating	CCC	B	BB	BBB	A	AA	AAA
Score	0 - 1.4	1.4-2.9	2.9-4.3	4.3-5.7	5.7-7.1	7.1-8.6	8.6-10

CARBON FOOTPRINT

As key climate change indicators, Greenhouse gas emissions (GHG) are classified as per the Greenhouse Gas Protocol and are grouped in three categories:

► **Scope 1 - Direct scope**: GHG emissions are those directly occurring from sources that are owned or controlled by the institution.
► **Scope 2 - Indirect scope**: GHG emissions are indirect emissions generated in the electricity production consumed by the institution.
► **Scope 3 - Indirect scope:** GHG emissions are all the other indirect emissions that are consequences of the institution's activities, but that occur from sources not owned and controlled by the institution.
The fund uses MSCI datas who are based on declarative or estimated figures from companies. It aims to take into account the GHG emissions of Scope 1 and 2, produced by the companies held in the portfolio. GHG emissions are compared to the sales of each company and adjusted with the security weight in the portfolio. Emissions are expressed in carbon dioxide equivalent (CO2e).

SUSTAINABLE IMPACT REVENUES

Revenue exposure to Sustainable Impact Solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

COVERAGE MSCI

The ESG MSCI rating does not cover all issuers, so it is important to display the coverage ratio to understand the rating. On this document, the rating coverage is displayed as a percentage (%), i.e. the percentage of covered securities on the entire portfolio.

CONTROVERSY

An ESG Controversy may be defined as an incident or ongoing situation in which a company faces allegations of negatively impacting stakeholders (i.e.: workers, communities, the environment, shareholders, or society at large), via some type of wrongdoing across several ESG indicators. The aim of ESG Controversies research is to assess the severity of the negative impact of each situation, rather than the extent of negative press attention or public opprobrium.
For each issuer, the ESG rating comes along with a Controversy flag which reflects the lowest flag among analyzed key indicators.

- **Green flag:** the company is not involved in major recent controversies
- **Yellow flag:** in recent moderate-to-severe level controversies
- **Orange flag:** one or more recent severe structural controversies that are ongoing
- **Red flag:** one or more recent very severe controversies

Controversy flag translates also into controversy score:
Red 0 - Orange 1 - Yellow 2 to 4 - Green 5 to 10

COMPANIES WITH CARBON EMISSION REDUCTION INITIATIVES

Companies with carbon emission reduction initiatives provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their greenhouse gas emissions. Targets adopted by companies to reduce greenhouse gas (GHG) emissions are considered "science-based" if they are in line with the goals of the Paris Agreement –to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C.
* Source : Science Based Target Initiative.

IMPACT INDICATORS

The impact indicators allow us to report on the environmental, social and governmental commitment of our investments in a relevant and sustainable manner. The four indicators displayed are not an exhaustive list, but were chosen by the management company.
Board Gender diversity: This figure represents the percentage of women on the board of directors of companies.
Company with a policy to address deforestation: Share of investment in companies with a policy of combating deforestation.

VIOLATIONS OF UN GLOBAL COMPACT PRINCIPLES AND OECD GUIDELINES

The United Nations Global Compact and the OECD Guidelines encourage ethical and responsible business behaviour by addressing issues such as human rights, labour, the environment and anti-corruption.

ESG LUXFLAG LABEL

LuxFLAG is an independent, non-profit, international association created in Luxembourg in July 2006. The objective of the LuxFLAG ESG Label is to reassure investors that the labelled funds actually incorporate ESG (Environmental, Social and Governance) criteria throughout the entire investment process.

DISCLAIMER
