

SG IS FUND - OPTIMAL INCOME

Monthly Factsheet

INVESTMENT OBJECTIVE

The sub-fund's objective is to outperform the corporate credit market over a 3 to 5 years investment horizon with less volatility. The sub-fund will not be managed against any particular benchmark and will pursue a total return approach. The sub-fund aims at meeting the long-term challenges of sustainable development while delivering financial performance by the combination of financial and extra-financial criteria, integrating environmental, social and governance criteria (ESG). The Sub-Fund is actively managed. It is not managed in reference to a benchmark.

PERFORMANCE

Past performance should not be seen as an indication of future performance.

Actual weighting and investment allocations are subject to change on an ongoing basis and may not be exactly as shown. Investors should understand the different asset classes which make up the strategy as they have different risk characteristics. Investments may be subject to market fluctuations and the price and value of investments and the income derived from them can go down as well as up. Your capital may be at risk and you may not get back the amount you invest. The tax benefits and liabilities will depend on individual circumstances and may change in the future.

MANAGEMENT COMMENTARY

The SG IS Fund - Optimal Income returned 0.73% over the final quarter to end the year with a solid performance of 7.96%. Risk assets continued their upward trending movement through the period despite some short-lived volatility episodes. Well oriented corporate earnings, easing inflationary pressures and central bank's cutting interest rates cycle acted as catalysts for global equity markets performance.

The structured products allocation enjoyed overall buoyant equity markets throughout the year thanks its equity sensitivity which boosted its mark-to-market valuation and therefore posted strong returns. Over the last quarter, capital guaranteed lines, offering full equity participation, provided the bulk of the performance. Specifically, the holdings positioned on the Ibex 35 Index as well as sector exposures on European banks and utilities enjoyed the solid momentum observed on those areas of the market. The manager tactically traded two new products to play potential catchups:

-An Athena on the Stoxx Europe Auto & Parts Index offering a hefty coupon of 9.8% with an important conditional capital protection set at 50%.

-An Airbag linked to the Swiss Market Index offering 215% of the positive performance for a conditional capital protection at 60%.

The bucket stands at 30.5% of the Fund with a diversification in terms of underlying assets and payoffs while offering a compelling average coupon of 7.8% on annual terms.

Central bankers' narrative has shifted towards a more accommodative stance, yet with an asymmetry between the US where further rate cuts are expected and Europe where the benchmark rate now sits at 2%. Yield chasing market participants exercised downward pressure on credit spreads over the period, high yield holdings posted a decent return while the investment grade segment of the portfolio was mostly flat. The convertible allocation benefited from their equity sensitivity amid well performing risk assets especially on some idiosyncratic positions held in the bucket. The manager opportunistically performed intra segment arbitrage throughout the period and sold short-dated bonds, the proceeds have been reinvested on longer dated issues to lock-in attractive carry while targeting a duration at the portfolio level around 4.5 years. In addition, the manager is still tactically holding an interest rate hedge traded earlier in the year to curb adverse effects of rising yields on overall allocation valuation.

GLOSSARY and DISCLAIMER

SFDR (Sustainable Finance Disclosure Regulation)

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosures in the financial services industry (the so-called SFDR Regulation or Disclosure Regulation).

TAXONOMY

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2002 (known as the Taxonomy Regulation) establishes a framework to facilitate sustainable investment and amends Regulation (EU) 2019/2088.

ESG RATING

MSCI ESG Ratings aim to measure a company's resilience to long-term, financially relevant ESG risks (Environment, Social et Gouvernance). For each company a Weighted Average Key Issue Score is calculated based on the underlying Key Issue scores and weights. To arrive at a final letter rating, this score is normalized by industry. **The Industry Adjusted Score corresponds to a rating between AAA and CCC.** These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.

*The ESG quality score of the universe is adjusted for the 20% lowest ESG scores.

Letter Rating	CCC	B	BB	BBB	A	AA	AAA
Score	0 - 1.4	1.4-2.9	2.9-4.3	4.3-5.7	5.7-7.1	7.1-8.6	8.6-10

CARBON FOOTPRINT

As key climate change indicators, Greenhouse gas emissions (GHG) are classified as per the Greenhouse Gas Protocol and are grouped in three categories:

- **Scope 1 - Direct scope:** GHG emissions are those directly occurring from sources that are owned or controlled by the institution.
- **Scope 2 - Indirect scope:** GHG emissions are indirect emissions generated in the electricity production consumed by the institution.
- **Scope 3 - Indirect scope:** GHG emissions are all the other indirect emissions that are consequences of the institution's activities, but that occur from sources not owned and controlled by the institution.

The fund uses MSCI data who are based on declarative or estimated figures from companies. It aims to take into account the GHG emissions of Scope 1 and 2, produced by the companies held in the portfolio. GHG emissions are compared to the sales of each company and adjusted with the security weight in the portfolio. Emissions are expressed in carbon dioxide equivalent (CO2e).

SUSTAINABLE IMPACT REVENUES

Revenue exposure to Sustainable Impact Solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

COVERAGE MSCI

The ESG MSCI rating does not cover all issuers, so it is important to display the coverage ratio to understand the rating. On this document, the rating coverage is displayed as a percentage (%), i.e. the percentage of covered securities on the entire portfolio.

DISCLAIMER

The content of this document should not be interpreted as an investment service or as investment advice, and under no circumstances is it to be used or considered as an offer or incentive to purchase or sell a particular product. The content is intended for information purposes only and to provide investors with the relevant reference information for any investment decisions. It has no regard to the specific financial objectives of any individual investor, nor may it be construed as legal, accounting or tax advice. Past performance is no indication of future results. Similarly, the present document is not intended as an incentive, offer or solicitation to invest in the asset categories listed herein. Investors are warned that the placing of stock market orders requires a perfect understanding of the markets and their governing legislation. Before investing, they must be aware that certain markets may be subject to rapid fluctuations and are speculative or lacking in liquidity. Accordingly, certain assets or categories of assets listed in the present document may not be appropriate for investors. In certain cases, investments may even bear an indeterminate high risk of loss that exceeds the initial investment made. Investors are therefore urged to seek the advice of their financial advisor or intermediary in order to assess the particular nature of an investment and the risks involved and its compatibility with their individual investment profile and objectives.

For Swiss investors: the Sub-Fund has been authorised for public sale by the Commission de Surveillance du Secteur Financier in Luxembourg and for public offering in Switzerland by the Swiss Financial Market Supervisory Authority (shortly 'FINMA'). The prospectus, the KIID (Key Investor Information Document) and annual reports of the Fund are available on the website www.fundinfo.com and can be obtained from our Representative and Paying Agent in Switzerland : Société Générale, Paris, succursale de Zurich, Talacker 50, Case postale 1928, 8021 Zurich.

CONTROVERSY

An ESG Controversy may be defined as an incident or ongoing situation in which a company faces allegations of negatively impacting stakeholders (i.e.: workers, communities, the environment, shareholders, or society at large), via some type of wrongdoing across several ESG indicators. The aim of ESG Controversies research is to assess the severity of the negative impact of each situation, rather than the extent of negative press attention or public opprobrium.

For each issuer, the ESG rating comes along with a Controversy flag which reflects the lowest flag among analyzed key indicators.

Green flag: the company is not involved in major recent controversies

Yellow flag: in recent moderate-to-severe level controversies

Orange flag: one or more recent severe structural controversies that are ongoing

Red flag: one or more recent very severe controversies

Controversy flag translates also into controversy score:

Red 0 - Orange 1 - Yellow 2 to 4 - Green 5 to 10

COMPANIES WITH CARBON EMISSION REDUCTION INITIATIVES

Companies with carbon emission reduction initiatives provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their greenhouse gas emissions. Targets adopted by companies to reduce greenhouse gas (GHG) emissions are considered "science-based" if they are in line with the goals of the Paris Agreement -to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C.

* Source : Science Based Target Initiative.

IMPACT INDICATORS

The impact indicators allow us to report on the environmental, social and governmental commitment of our investments in a relevant and sustainable manner. The four indicators displayed are not an exhaustive list, but were chosen by the management company.

Board Gender diversity: This figure represents the percentage of women on the board of directors of companies.

Company with a policy to address deforestation: Share of investment in companies with a policy of combating deforestation.

VIOLATIONS OF UN GLOBAL COMPACT PRINCIPLES AND OECD GUIDELINES

The United Nations Global Compact and the OECD Guidelines encourage ethical and responsible business behaviour by addressing issues such as human rights, labour, the environment and anti-corruption.

ESG LUXFLAG LABEL

LuxFLAG is an independent, non-profit, international association created in Luxembourg in July 2006. The objective of the LuxFLAG ESG Label is to reassure investors that the labelled funds actually incorporate ESG (Environmental, Social and Governance) criteria throughout the entire investment process.
