

SG IS FUND - EUROPEAN EQUITY QUALITY INCOME

Monthly Factsheet

INVESTMENT OBJECTIVE

The Sub-Fund seeks to provide long-term capital appreciation over a cycle of 5 years, primarily through investments in a portfolio of European Equities. The aim of the Sub-Fund is to identify companies that exhibit sustainable quality and income characteristics. The Sub-Fund is actively managed with reference to the following benchmark: Stoxx Europe 600 Net return. The benchmark is used both for performance comparison and as a universe from which to select securities.

PERFORMANCE

Past performance should not be seen as an indication of future performance.

MANAGEMENT COMMENTARY

European markets ended Q3 higher, with the STOXX600 posting a performance of +3.11%.

This performance was supported in July by encouraging corporate earnings, as well as the Fed's rate cut in September, following months of anticipation and pressure from the U.S. administration.

From a global perspective, the quarter was marked by the persistence of uncertainties already present in Q2.

The tariffs imposed by Trump continue to generate significant volatility, hindering long-term projections. The war in Ukraine, which seemed to be nearing resolution during the summer summit between Trump and Putin in Alaska, remains ongoing. Putin shows no intention of stopping, while Trump now supports Ukraine in a future effort to reclaim its territories.

In this uncertain macroeconomic context, the rise in precious metal prices continues, positively impacting mining companies.

Uncertainty is also growing in France, with debt still increasing and a significant deficit, while no budget agreement has been reached amid a politically unstable climate, as evidenced by the recent change of Prime Minister.

On the central bank front, the Fed finally cut rates by 25 bps in September, with 1 to 2 additional cuts possible by year-end. The BOE lowered its key rate by 25 bps to 4.0%. The RBA cut rates by 25 bps to 3.60%, as expected. New Zealand also lowered its interest rates by 25 bps to 3%, in line with expectations. The ECB kept its rates unchanged, with the deposit rate at 2%, as did the BoJ, maintaining its rate at 0.5%.

The Quality Income portfolio posted a quarterly performance of +3.58%, a slight underperformance of -0.7% compared to its benchmark.

This difference is explained by negative stock selection and allocation effects, partially offset by a favorable currency effect.

Among the main contributors to performance, the Finance (+23%) and Industry (+21%) segments stood out. Key performers included: Standard Chartered (+59%), Commerzbank (+43%), Allianz (+16%), and ABB (+56%).

Europe's push for technological sovereignty, combined with the U.S. high-tech momentum, propelled ASML (+80%), contributing 3.51% to the portfolio's performance alone.

Telenor, representing 3.23% of the portfolio, also performed well (+21.8%) after securing defense contracts worth €15 million in Finland and Sweden.

The healthcare sector was shaken by Trump's push to lower drug prices in the U.S. through a 100% tax on imported products, despite concessions from pharmaceutical companies. This source of uncertainty weighs on the sector: Roche, accounting for 2.6% of the portfolio, posted a modest performance (+1.4%), while Essilor performed better (+14.2%) but contributed less (0.8%).

Consumer sentiment remains weak in this uncertain environment, with high savings and low willingness to spend. The consumer segment suffered, with sharp declines for Unilever (-30%), Coca-Cola (-19%), and even in luxury, with Hermès down -28%.

Looking ahead to the coming quarters, we remain cautious in light of geopolitical uncertainties and ongoing trade tensions between the U.S. and its partners.

GLOSSARY and DISCLAIMER

SFDR (Sustainable Finance Disclosure Regulation)

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosures in the financial services industry (the so-called SFDR Regulation or Disclosure Regulation).

TAXONOMY

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 (known as the Taxonomy Regulation) establishes a framework to facilitate sustainable investment and amends Regulation (EU) 2019/2088.

ESG RATING

MSCI ESG Ratings aim to measure a company's resilience to long-term, financially relevant ESG risks (Environment, Social et Gouvernance). For each company a Weighted Average Key Issue Score is calculated based on the underlying Key Issue scores and weights. To arrive at a final letter rating, this score is normalized by industry. **The Industry Adjusted Score corresponds to a rating between AAA and CCC.** These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.

*The ESG quality score of the universe is adjusted for the 20% lowest ESG scores.

Letter Rating	CCC	B	BB	BBB	A	AA	AAA
Score	0 - 1.4	1.4-2.9	2.9-4.3	4.3-5.7	5.7-7.1	7.1-8.6	8.6-10

CARBON FOOTPRINT

As key climate change indicators, Greenhouse gas emissions (GHG) are classified as per the Greenhouse Gas Protocol and are grouped in three categories:

- **Scope 1 - Direct scope:** GHG emissions are those directly occurring from sources that are owned or controlled by the institution.
- **Scope 2 - Indirect scope:** GHG emissions are indirect emissions generated in the electricity production consumed by the institution.
- **Scope 3 - Indirect scope:** GHG emissions are all the other indirect emissions that are consequences of the institution's activities, but that occur from sources not owned and controlled by the institution.

The fund uses MSCI data who are based on declarative or estimated figures from companies. It aims to take into account the GHG emissions of Scope 1 and 2, produced by the companies held in the portfolio. GHG emissions are compared to the sales of each company and adjusted with the security weight in the portfolio. Emissions are expressed in carbon dioxide equivalent (CO2e).

SUSTAINABLE IMPACT REVENUES

Revenue exposure to Sustainable Impact Solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

COVERAGE MSCI

The ESG MSCI rating does not cover all issuers, so it is important to display the coverage ratio to understand the rating. On this document, the rating coverage is displayed as a percentage (%), i.e. the percentage of covered securities on the entire portfolio.

DISCLAIMER

The content of this document should not be interpreted as an investment service or as investment advice, and under no circumstances is it to be used or considered as an offer or incentive to purchase or sell a particular product. The content is intended for information purposes only and to provide investors with the relevant reference information for any investment decisions. It has no regard to the specific financial objectives of any individual investor, nor may it be construed as legal, accounting or tax advice. Past performance is no indication of future results. Similarly, the present document is not intended as an incentive, offer or solicitation to invest in the asset categories listed herein. Investors are warned that the placing of stock market orders requires a perfect understanding of the markets and their governing legislation. Before investing, they must be aware that certain markets may be subject to rapid fluctuations and are speculative or lacking in liquidity. Accordingly, certain assets or categories of assets listed in the present document may not be appropriate for investors. In certain cases, investments may even bear an indeterminate high risk of loss that exceeds the initial investment made. Investors are therefore urged to seek the advice of their financial advisor or intermediary in order to assess the particular nature of an investment and the risks involved and its compatibility with their individual investment profile and objectives.

For Swiss investors: the Sub-Fund has been authorised for public sale by the Commission de Surveillance du Secteur Financier in Luxembourg and for public offering in Switzerland by the Swiss Financial Market Supervisory Authority (shortly 'FINMA'). The prospectus, the KIID (Key Investor Information Document) and annual reports of the Fund are available on the website www.fundinfo.com and can be obtained from our Representative and Paying Agent in Switzerland : Société Générale, Paris, succursale de Zurich, Talacker 50, Case postale 1928, 8021 Zurich.

CONTROVERSY

An ESG Controversy may be defined as an incident or ongoing situation in which a company faces allegations of negatively impacting stakeholders (i.e.: workers, communities, the environment, shareholders, or society at large), via some type of wrongdoing across several ESG indicators. The aim of ESG Controversies research is to assess the severity of the negative impact of each situation, rather than the extent of negative press attention or public opprobrium.

For each issuer, the ESG rating comes along with a Controversy flag which reflects the lowest flag among analyzed key indicators.

-  **Green flag:** the company is not involved in major recent controversies
-  **Yellow flag:** in recent moderate-to-severe level controversies
-  **Orange flag:** one or more recent severe structural controversies that are ongoing
-  **Red flag:** one or more recent very severe controversies

Controversy flag translates also into controversy score:

Red 0 - Orange 1 - Yellow 2 to 4 - Green 5 to 10

COMPANIES WITH CARBON EMISSION REDUCTION INITIATIVES

Companies with carbon emission reduction initiatives provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their greenhouse gas emissions. Targets adopted by companies to reduce greenhouse gas (GHG) emissions are considered "science-based" if they are in line with the goals of the Paris Agreement –to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C.

* Source : Science Based Target Initiative.

IMPACT INDICATORS

The impact indicators allow us to report on the environmental, social and governmental commitment of our investments in a relevant and sustainable manner. The four indicators displayed are not an exhaustive list, but were chosen by the management company. Board Gender diversity: This figure represents the percentage of women on the board of directors of companies. Company with a policy to address deforestation: Share of investment in companies with a policy of combating deforestation.

VIOLATIONS OF UN GLOBAL COMPACT PRINCIPLES AND OECD GUIDELINES

The United Nations Global Compact and the OECD Guidelines encourage ethical and responsible business behaviour by addressing issues such as human rights, labour, the environment and anti-corruption.

ESG LUXFLAG LABEL

LuxFLAG is an independent, non-profit, international association created in Luxembourg in July 2006. The objective of the LuxFLAG ESG Label is to reassure investors that the labelled funds actually incorporate ESG (Environmental, Social and Governance) criteria throughout the entire investment process.
