## WHAT HAPPENS IF Société Générale Private Wealth Management S.A. IS UNABLE TO PAY OUT?

Société Générale Private Wealth Management (SGPWM) is a management company licensed and supervised by the CSSF. SGPWM complies with organizational and operational rules, in particular as regards capital requirements. A separate pool of assets is invested and maintained for each Sub-Fund. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the management company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the management company or any delegated service provider were to fail or default.

## WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures are estimates and may change in the future. You should note that these costs are paid by the Company whereas the return that you may receive will depend on the Company's share price performance. There is no direct link between the Company's share price and the costs that it pays.

### Costs over time

<b>Total costs</b>	<b>£690</b>	<b>£1,180</b>
<b>Annual cost impact (*)</b>	6.9% each year	3.8% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.0% before costs and 0.2% after costs.
