MOOREA FUND - US EQUITY

A sub-fund of Moorea Fund

Class Retail EUR (RE) - LU1648219605

Moorea Fund is authorised in Luxembourg and is submitted to the supervision of the Luxembourg financial authority, Commission de Surveillance du Secteur Financier (CSSF).

Management company: Société Générale Private Wealth Management S.A.

Objectives and Investment Policy

Objectives

The Sub-Fund seeks to provide long-term capital growth by investing primarily in equities of US sustainable companies or companies that demonstrate improving sustainable characteristics.

Investment policy

The Sub-Fund invests at least 90% of its assets in equities of companies that are domiciled, or carrying out the main part of their economic activity, in the USA. All the equities invested in portfolio will be researched and analysed from an ESG standpoint. The Sub-Fund will mainly invest in sustainable companies or companies that demonstrate improving sustainable characteristics.

The portfolio will invest in approximately 50 to 70 companies included in the S&P 500 index. Up to 10% of the portfolio could be invested in securities not included in the S&P500 index. The portfolio may also invest in Canadian companies.

Sustainable investment policy

The Sub-fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. It takes into account ESG criteria in its investment process and applies the Sustainable investment policy of Société Générale Private Wealth Management S.A., available at: www.sgpmw.societegenerale.com.

The IM addresses ESG factors throughout the investment process, including research, company engagement and portfolio construction by incorporating a sector exclusion policy completed by an ESG Integration policy.

Sector exclusion policy

The Sub-Fund excludes of the investment universe companies that have significantly and repeatedly transgressed one of the 10 United Nations Global Compact principles, or having controversial activities such as thermal coal, chemical weapons etc., or being involved in one or more recent very severe controversies under the MSCI nomenclature (red flag). In addition, the IM employs norms and value-based exclusions as well. Examples of the exclusions (but not limited to them) are controversial weapons, gambling, adult entertainment, tobacco and fossil fuels which is driven by revenue thresholds.

Risk and Reward Profile

|---|---|---|---|---|---|---|

The investment process begins with the defining of a risk budget, in terms of volatility in order to remain compliant with the risk profile of the Sub-Fund.

Why is this share class in this category?

This Sub-Fund is in category 6 because its simulated historical value has shown relatively high volatility. Historical data, such as are used in calculating the synthetic indicator, may not be reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed to remain unchanged and that the categorisation of the Sub-Fund may shift over time. The lowest category does not mean a risk-free investment.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

ESG integration policy

The ESG views are the product of proprietary research and one-on-one engagement with companies. In addition, the IM draws on data from external providers. The IM uses the following framework to assess the ESG credentials of any business:

- A proprietary ESG scoring methodology applied to the entire stock universe of the strategy.
- A strategic classification framework for the entire research universe.
- Deep-dive research into specific ESG topics identified as material to the investment process, for stocks and sectors.

Additionally, the strategy is excluding the bottom-quintile of securities based on the IM's risk framework driven by the analysis of strategic classifications and proprietary ESG database.

The portfolio approach follows a "best-in-class" approach trying to identify clear sustainable leaders in the respective industries or companies which are improving their sustainability characteristics in the foreseeable future ("best effort").

Benchmark

The Sub-fund is actively managed with reference to the S&P 500 Index. This benchmark is used both for performance comparison and as a universe from which to select securities.

Sub-Fund Currency

The Class RE is an accumulation unit in EUR.

Recommendation

The recommended investment period in this Sub-Fund is 3-5 years.

Net asset value calculation frequency

Daily, any full working day in Luxembourg and United States when the banks are opened for business. The investor has the possibility to obtain the reimbursement of his/her shares on request one Luxembourg Business Day before the Valuation Day before 2 p.m.

The shares are capitalized. In consequence, unless specifically decided otherwise, no dividends are distributed to the shareholders.

The Sub-Fund can be also exposed to the following risks which are not adequately taken into account by the indicators of risk above:

Liquidity Risk

The Sub-Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price is most beneficial to the Sub-Fund and may be unable to raise cash to meet redemption requests.

Operational Risk

Operational risk refers to a failure or delay in the system, processes and controls of the Sub-Fund or its service providers which could lead to losses for the Sub-Fund.

Market Risk

The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.

Concentration Risk

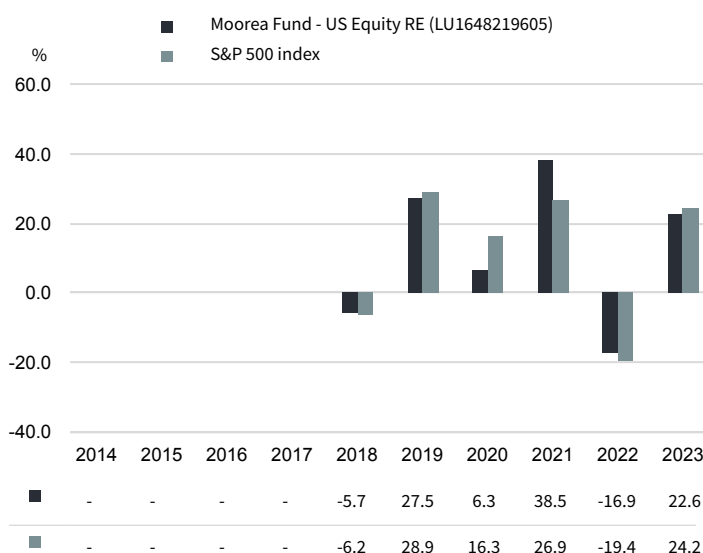

The Sub-Fund may be subject to significant losses if it holds a large position in a particular investment that declines in value or is otherwise adversely affected, including default of the issuer. Otherwise adversely affected, including default of the issuer.
