WHAT IS THIS PRODUCT?

Type: This product is a share of a Sub-Fund of Moorea Fund

Term: The Sub-Fund has a recommended holding period of 5 years.

Objective:

Investment objective: Sterling Multi-Asset Growth is an actively managed Sub-Fund that aims to provide capital growth to investors from a diversified portfolio of investments. The overall risk of the fund is intended to be consistent with that of a dynamic portfolio, taking a high level of risk.

Investment policy: The Sub-Fund will seek to achieve its objective by investing through a well-diversified portfolio of equities, bonds and money market instruments.

The Sub-Fund is a Fund of Fund, at least 80% of the net assets will be invested through UCITS, UCIs and UCITS ETF.

The Sub-Fund will target 75% of the net assets to be invested directly and/or indirectly in shares and other equities. The equity allocation will vary according to market conditions within a range of +/- 20% from this target. There is no specific target market or geographic sector.

The remainder may be invested in other securities including:

- Debt instruments rated Investment Grade and/or High Yield (at least rated BB- by Standard & Poor's), targeting a 15% allocation with a range of +/-15%;
- Money Market Instruments with a maximum of 20%;
- Alternative funds compliant with UCITS rules, targeting a 10% allocation with a range of +/- 10%.

The Sub-Fund may be exposed to emerging markets through its investments in collective schemes, with a maximum of 30% of its net assets. The Sub-Fund may invest in Contingent convertible capital instruments (CoCos), respecting a maximum of 10% of the Net Asset Value. At least 50% of the net assets will be invested in GBP denominated investments.

SFDR Category: Article 8

Benchmark: The Sub-Fund is actively managed without reference to a benchmark. For the purpose of performance comparison only, the return of the Sub-Fund will be compared to the following composite benchmark: 50% MSCI ACWI, 17.5% BofA Merrill Lynch 1-10 Year UK Gilt, 17.5% BofA Merrill Lynch 1-10 Year Sterling Corporate, 10% HFRX Global Hedge Fund GBP Index and 5% SONIA GBP Overnight.

Income: Accumulation share class, the dividend is reinvested.

Investment horizon: The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

Currency: Your shares will be denominated in GBP, which is the Fund's base currency.

Processing and redemption orders: You can buy and sell your shares daily.

Depositary: Société Générale Luxembourg

Intended Investor: This share class is intended for institutional investors. The fund is dedicated to investors who have neither financial expertise nor any specific knowledge to understand the Sub-Fund but nevertheless may bear total capital loss. It is suitable for investor who seeks growth of capital. Potential investors should have an investment horizon of at least 5 years.

WHAT ARE THE RISKS AND WHAT COULD I GET BACK IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 5 year(s). Selling before the end of this period significantly increases the risk of lower investment returns or a loss.

We have classified this product as out of 7, which is PRIIP_S4_SRI_ElementBValueText risk class. This rates the potential losses from future performance at a medium level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Fund prospectus.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are illustrations using the worst, average, and best performance of the product, which may include input from benchmark / proxy, over the last ten years. The figures are not an exact indicator, markets could develop very differently in the future. What you get will vary depending on how the market performs and how long you keep the investment/product.

Recommended Holding Period: 5 year(s)

Investment = £ 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Unfavourable	What you might get back after costs	-	-

WHAT HAPPENS IF Société Générale Private Wealth Management S.A. IS UNABLE TO PAY OUT?

Société Générale Private Wealth Management (SGPWM) is a management company licensed and supervised by the CSSF. SGPWM complies with organizational and operational rules, in particular as regards capital requirements. A separate pool of assets is invested and maintained for each Sub-Fund. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the management company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the management company or any delegated service provider were to fail or default.

WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures are estimates and may change in the future. You should note that these costs are paid by the Company whereas the return that you may receive will depend on the Company's share price performance. There is no direct link between the Company's share price and the costs that it pays.

Costs over time

	If you exit after 1 year	If you exit after 5 years
Total costs	£-	£-
Annual cost impact (*)	-% each year	-% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -% before costs and -% after costs.

Table 2: Composition of costs

One-off costs		If you exit after 1 year
