Performance Scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

Recommended Holding Period: 5 years

Investment = € 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	€7,990	€7,700
	Average return each year	-20.1%	-5.1%
Unfavourable	What you might get back after costs	€8,250	€8,730
	Average return each year	-17.5%	-2.7%
Moderate	What you might get back after costs	€9,590	€9,570
	Average return each year	-4.1%	-0.9%
Favourable	What you might get back after costs	€10,280	€10,500
	Average return each year	2.8%	1.0%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: October 2017 and November 2022

Moderate Scenario: December 2018 and December 2023

Favourable Scenario: December 2015 and December 2020

WHAT HAPPENS IF Société Générale Investment Solutions (Europe) IS UNABLE TO PAY OUT?

The Company is not required to make any payment to you in respect of your investment. If the Company was liquidated, you would be entitled to receive a distribution equal to your share of the Company's assets, after payment of all of its creditors. The Company has no obligation to make any payment to you in respect of the ordinary shares. There is no compensation or guarantee scheme in place that applies to the Company and, if you invest in the Company, you should be prepared to assume the risk that you could lose all of your investment. As a shareholder in the Company, you would not be able to make a claim to the Financial Services Compensation Scheme in the event that the Company is unable to pay you anything on its liquidation.

WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest €10,000. The figures are estimates and may change in the future. You should note that these costs are paid by the Company whereas the return that you may receive will depend on the Company's share price performance. There is no direct link between the Company's share price and the costs that it pays.

Table 1: Costs over time

	If you exit after 1 year	If you exit after 5 years
Total costs	€670	€1,070
Annual cost impact (*)	6.7% each year	2.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.2% before costs and -0.9% after costs.

Table 2: Composition of costs

One-off costs		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment. This is the most you will pay, you could pay less;	5.0%
Exit costs	The impact of the costs of exiting your investment when it matures.	0.8%
Ongoing costs		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investment.	1.0%
Portfolio transaction costs	The costs of buying and selling the investments the Sub-Fund owns (estimate based on previous year's costs).	0.1%
Incidental costs		
Performance fees	The actual amount varies depending on how well your investment performs. The cost-estimation is an average over the last 5 years.	0.0%
