WHAT IS THIS PRODUCT?

Type: This product is a share of a Sub-Fund of SG IS Fund

Tern: The Sub-Fund is managed according to a maturity set at 31 December 2033. The liquidation of the Sub-Fund may take place a few weeks prior to maturity. The Board of Directors will provide Shareholders with a written communication, ahead of the liquidation, to remind them of the upcoming effective date of this event. The maturity date may be postponed if the Board of Directors consider it to be in the Shareholders' best interest, notably to ensure a smooth liquidity. Shareholders will be informed of this decision and will have the option to request the redemption of their Shares free of charge.

Objective:

Investment objective: The investment objective of the Sub-Fund is to achieve steady returns over the pre-defined investment horizon, by investing in bonds that generate environmental benefits and whose selected issuers follow good governance and social practices.

Investment policy: The Sub-Fund's investment strategy is to primarily invest in a selection of bonds issued by corporate issuers. The majority of the bonds held in the portfolio will have a final maturity date prior to 30 June 2034. Securities maturing before 2034 will be reinvested in instruments that comply with the investment restrictions.

The Sub-Fund's investment strategy consists in the discretionary management of a diversified portfolio of debt securities, including euro-denominated bonds, green, social and sustainability bonds, UCITS, collective investment schemes and ETFs.

The strategy is not limited to a buy-and-hold approach. The Investment Manager may carry out rebalancing transactions should new market opportunities arise, if the risk of default at maturity increases for any issuer in the portfolio, or in the event of a deterioration in ESG criteria. The Sub-Fund will maintain diversification across geographies, sectors and issuers.

SFDR Category: Article 8. The Investment Manager adopts a holistic approach to sustainable investing and addresses ESG factors throughout the investment process, including research, company engagement and portfolio construction. The Investment Manager incorporates an exclusion policy complemented by the integration of ESG criteria.

Benchmark: The Sub-Fund is actively managed. The following indices are used as a universe from which to select securities: ICE BofA Euro Corporate (ER00 Index) and ICE BofA Euro High Yield BB (HE10 Index). The index ICE BofA 3-5 Year Euro Corporate (ER02 Index) may be used for performance comparison.

Income: Accumulation share class, the dividend is reinvested.

Investment horizon: The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years or until 31/12/2033.

Currency: Your shares will be denominated in EUR, which is the Sub-Fund's base currency.

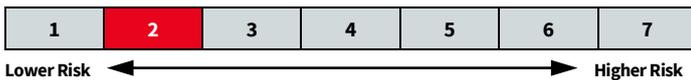

Processing and redemption orders: Subscription and redemption orders must be received by the transfer agent before 5 p.m. (Luxembourg time) on Friday. The net asset value is calculated on a weekly basis on the Tuesday of each week or, if this day is not a business day as defined in the general part of the prospectus, on the next business day.

Depositary: Société Générale Luxembourg

Intended Investor: This share class is intended for all investors. The fund is dedicated to investors who have neither financial expertise nor any specific knowledge to understand the Sub-Fund but nevertheless may bear total capital loss. It is suitable for investor who seeks growth of capital. Potential investors should have an investment horizon of at least 5 years.

WHAT ARE THE RISKS AND WHAT COULD I GET BACK IN RETURN?

Risk indicator

The risk indicator assumes you keep the product until 31 December 2033.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Fund prospectus.

Performance scenario

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are illustrations using the worst, average, and best performance of the product, which may include input from benchmark / proxy, over the last ten years. The figures are not an exact indicator, markets could develop very differently in the future. What you get will vary depending on how the market performs and how long you keep the investment/product

Recommended Holding Period: 5 year(s)

Investment = € 10.000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

WHAT HAPPENS IF SOCIETE GENERALE INVESTMENT SOLUTIONS (EUROPE) IS UNABLE TO PAY OUT?

Société Générale Investment Solutions (Europe) (SG IS Europe) is a management company licensed and supervised by the CSSF. SG IS Europe complies with organizational and operational rules, in particular as regards capital requirements. A separate pool of assets is invested and maintained for each Sub-Fund. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the management company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the management company or any delegated service provider were to fail or default.

WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures are estimates and may change in the future. You should note that these costs are paid by the Company whereas the return that you may receive will depend on the Company's share price performance. There is no direct link between the Company's share price and the costs that it pays.

Costs over time

	If you exit after 1 year	If you exit after 5 years
Total costs	€ 638	€ 815
Annual cost impact *	6.4% each year	1.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 0.7% before costs and -0.9% after costs.
