SG IS FUND - SHORT TERM BONDS

Monthly Factsheet

ESG

LUXFLAG Label

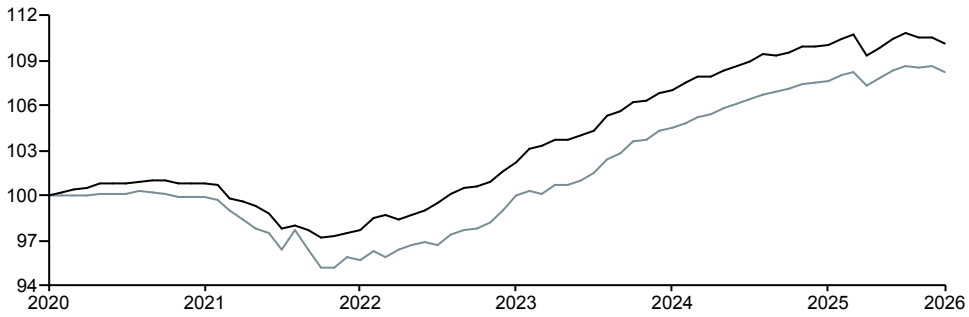

INVESTMENT OBJECTIVE

The objective of the Sub-Fund is to deliver income and capital appreciation by investing in a diversified portfolio of debt securities denominated in Euro. The Sub-Fund aims at meeting the long-term challenges of sustainable development while delivering financial performance by the combination of financial and extra-financial criteria, integrating environmental, social and governance criteria (ESG).
The Sub-Fund is actively managed without reference to a benchmark. For the purpose of performance comparison only, the return of the Sub-Fund will be compared to the following composite benchmark: 80% ICE Bofa-AML Euro Corpo 1-3 ans (ER01 Index) and 20% ESTR Compounded Index (ESTCINDX Index).

PERFORMANCE

Past performance should not be seen as an indication of future performance.

MANAGEMENT COMMENTARY

Macroeconomic Environment

As of the end of September, the macroeconomic environment remains characterized by rising long-term interest rates on both sides of the Atlantic.
In the euro area, resilient economic activity and higher energy prices have led the European Central Bank (ECB) to continue its monetary tightening cycle, with a cumulative increase of 50 basis points since the beginning of the year. Economic growth remains positive but moderate, while higher sovereign bond yields continue to weigh on fixed income valuations.
In the United States, economic growth remains more robust, and the services sector continues to show strength. However, inflation remains above target, prompting the Federal Reserve to maintain a restrictive policy stance. Treasury yields have remained close to their yearly highs, despite increasingly attractive carry opportunities in the bond market.
The end of September was also marked by heightened volatility in European government bond markets, particularly in France. Heavy debt issuance, central bank balance sheet reduction, and political uncertainty continue to put upward pressure on yields. Nevertheless, the ECB retains tools that can help limit the risk of excessive fragmentation within the euro area.

Credit Markets

European credit markets remain resilient, supported by strong fundamentals despite historically low credit spreads and increased volatility in sovereign bond markets.
During the month, spreads remained close to 55 basis points for Investment Grade bonds and 260 basis points for High Yield bonds. Elevated risk-free rates continue to support attractive yield levels, although French issuers experienced greater differentiation amid the widening of the French sovereign risk premium.
The primary market remained particularly active in September. Strong issuance volumes were well absorbed by investor demand, although investors have become more selective and, in some cases, require larger new-issue concessions.
European corporate fundamentals remain sound, with leverage ratios and interest coverage levels broadly stable. While the High Yield default rate remains above its historical average, the outlook continues to improve under our central scenario.

SG IS Fund – Short Term Bonds

As of 30 September 2026, the net performance of **SG IS Short Term Bonds** stood at **+0.06% year-to-date**. The Fund has therefore maintained a slightly positive return despite rising short-term interest rates and the volatility experienced across bond markets.
Through the end of February 2026, the Fund's performance remained fully in line with its income-generation objective, with a gain of **+2.57%**. However, the deterioration of the geopolitical situation in the Middle East reignited market volatility and inflation concerns, particularly through higher energy prices. This environment prompted the ECB to continue tightening monetary policy by raising its key interest rates twice by 25 basis points.
Although the increase in short-term interest rates temporarily weighed on the valuation of the portfolio's fixed-income holdings, the Fund maintains a highly defensive profile, with an allocation invested exclusively in short-maturity, euro-denominated **Investment Grade** bonds.
The portfolio is evenly distributed across 1-year, 2-year and 3-year maturities, allowing performance to improve rapidly as bonds mature and proceeds are reinvested at higher yields.
The Fund's positioning remains firmly conservative and well diversified, with **137 short-maturity Investment Grade bonds** and an average position weight of **0.81%**. Exposure to French issuers remains under control at **23% of the portfolio**, compared with **20% for the European Corporate Bonds 1-3 Years Index**. Furthermore, in order to limit exposure to political risk associated with upcoming French elections, recent investments have been directed toward non-French issuers.
The Fund offers an attractive yield of **3.94%**, combined with a controlled duration of **1.72 years** and an average credit rating of **BBB+**, reinforcing its role as a defensive and stable investment solution in an uncertain market environment.

Performance

Year-to-date performance: +0.06%.

GLOSSARY and DISCLAIMER

SFDR (Sustainable Finance Disclosure Regulation)

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosures in the financial services industry (the so-called SFDR Regulation or Disclosure Regulation).

TAXONOMY

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2002 (known as the Taxonomy Regulation) establishes a framework to facilitate sustainable investment and amends Regulation (EU) 2019/2088.

ESG RATING

MSCI ESG Ratings aim to measure a company's resilience to long-term, financially relevant ESG risks (Environment, Social et Gouvernance). For each company a Weighted Average Key Issue Score is calculated based on the underlying Key Issue scores and weights. To arrive at a final letter rating, this score is normalized by industry. **The Industry Adjusted Score corresponds to a rating between AAA and CCC.** These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.
*The ESG quality score of the universe is adjusted for the 20% lowest ESG scores.

Letter Rating	CCC	B	BB	BBB	A	AA	AAA
Score	0 - 1.4	1.4-2.9	2.9-4.3	4.3-5.7	5.7-7.1	7.1-8.6	8.6-10

CARBON FOOTPRINT

As key climate change indicators, Greenhouse gas emissions (GHG) are classified as per the Greenhouse Gas Protocol and are grouped in three categories:

► **Scope 1 - Direct scope**: GHG emissions are those directly occurring from sources that are owned or controlled by the institution.
► **Scope 2 - Indirect scope**: GHG emissions are indirect emissions generated in the electricity production consumed by the institution.
► **Scope 3 - Indirect scope:** GHG emissions are all the other indirect emissions that are consequences of the institution's activities, but that occur from sources not owned and controlled by the institution.
The fund uses MSCI datas who are based on declarative or estimated figures from companies. It aims to take into account the GHG emissions of Scope 1 and 2, produced by the companies held in the portfolio. GHG emissions are compared to the sales of each company and adjusted with the security weight in the portfolio. Emissions are expressed in carbon dioxide equivalent (CO2e).

SUSTAINABLE IMPACT REVENUES

Revenue exposure to Sustainable Impact Solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

COVERAGE MSCI

The ESG MSCI rating does not cover all issuers, so it is important to display the coverage ratio to understand the rating. On this document, the rating coverage is displayed as a percentage (%), i.e. the percentage of covered securities on the entire portfolio.

CONTROVERSY

An ESG Controversy may be defined as an incident or ongoing situation in which a company faces allegations of negatively impacting stakeholders (i.e.: workers, communities, the environment, shareholders, or society at large), via some type of wrongdoing across several ESG indicators. The aim of ESG Controversies research is to assess the severity of the negative impact of each situation, rather than the extent of negative press attention or public opprobrium.
For each issuer, the ESG rating comes along with a Controversy flag which reflects the lowest flag among analyzed key indicators.

- **Green flag:** the company is not involved in major recent controversies
- **Yellow flag:** in recent moderate-to-severe level controversies
- **Orange flag:** one or more recent severe structural controversies that are ongoing
- **Red flag:** one or more recent very severe controversies

Controversy flag translates also into controversy score:
Red 0 - Orange 1 - Yellow 2 to 4 - Green 5 to 10

COMPANIES WITH CARBON EMISSION REDUCTION INITIATIVES

Companies with carbon emission reduction initiatives provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their greenhouse gas emissions. Targets adopted by companies to reduce greenhouse gas (GHG) emissions are considered "science-based" if they are in line with the goals of the Paris Agreement –to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C.
* Source : Science Based Target Initiative.

IMPACT INDICATORS

The impact indicators allow us to report on the environmental, social and governmental commitment of our investments in a relevant and sustainable manner. The four indicators displayed are not an exhaustive list, but were chosen by the management company.
Board Gender diversity: This figure represents the percentage of women on the board of directors of companies.
Company with a policy to address deforestation: Share of investment in companies with a policy of combating deforestation.

VIOLATIONS OF UN GLOBAL COMPACT PRINCIPLES AND OECD GUIDELINES

The United Nations Global Compact and the OECD Guidelines encourage ethical and responsible business behaviour by addressing issues such as human rights, labour, the environment and anti-corruption.

ESG LUXFLAG LABEL

LuxFLAG is an independent, non-profit, international association created in Luxembourg in July 2006. The objective of the LuxFLAG ESG Label is to reassure investors that the labelled funds actually incorporate ESG (Environmental, Social and Governance) criteria throughout the entire investment process.

DISCLAIMER

The content of this document should not be interpreted as an investment service or as investment advice, and under no circumstances is it to be used or considered as an offer or incentive to purchase or sell a particular product. The content is intended for information purposes only and to provide investors with the relevant reference information for any investment decisions. It has no regard to the specific financial objectives of any individual investor, nor may it be construed as legal, accounting or tax advice. Past performance is no indication of future results. Similarly, the present document is not intended as an incentive, offer or solicitation to invest in the asset categories listed herein. Investors are warned that the placing of stock market orders requires a perfect understanding of the markets and their governing legislation. Before investing, they must be aware that certain markets may be subject to rapid fluctuations and are speculative or lacking in liquidity. Accordingly, certain assets or categories of assets listed in the present document may not be appropriate for investors. In certain cases, investments may even bear an indeterminate high risk of loss that exceeds the initial investment made. Investors are therefore urged to seek the advice of their financial advisor or intermediary in order to assess the particular nature of an investment and the risks involved and its compatibility with their individual investment profile and objectives.
For Swiss investors: the Sub-Fund has been authorised for public sale by the Commission de Surveillance du Secteur Financier in Luxembourg and for public offering in Switzerland by the Swiss Financial Market Supervisory Authority (shortly 'FINMA').
